Information Systems student building web applications with React, Next.js, and Javascript/Typescript. Experienced in frontend interfaces, and real-time features; seeking a Web Developer or Frontend Developer internship.

Technologies and Languages

- Languages: JavaScript, HTML, CSS, Python, Dart
- Technologies: React, Next.js, Vite, Tailwind CSS, Firebase, Firestore, React Native
- AI & IS: AI-Powered Application Development, Context-Aware AI Integration, LLM Integration, Computer Vision, Intelligent Automation
- Other: Git/GitHub, Responsive Design, Component-Based UI, State Management, Authentication, Data Visualization, Database Design

Projects

VISAIA Dashboard — Farm Management & Pest Monitoring Web Platform
Next.js · React · TypeScript · Firebase Authentication · Firestore · Leaflet

- Developed a web dashboard for agricultural administrators to monitor farm records, crop cycles, and pest reports with authenticated, role-based access.
- Built interactive maps and analytics views to present field locations, pest findings, and monitoring trends from Firestore data.
- Implemented PDF, CSV, and Excel report exports to support agricultural reporting and analysis.

VISAIA — Farm Management & Pest Monitoring Mobile App
Flutter · Dart · Firebase Authentication · Firestore · Provider · REST APIs

- Developed mobile workflows for farm setup, crop cycles, activity logging, and pest monitoring, with Firebase authentication and Firestore data storage.
- Integrated GPS-based field mapping and image submissions to a pest detection API, presenting findings and treatment recommendations in the app.
- Organized shared farm state with Provider and separated reusable widgets, data models, and service layers.

Revia — Study Space Discovery & Booking Platform
React · JavaScript · Vite · Tailwind CSS · Firebase · Firestore · React Router

- Developed web interfaces for students and study hub owners, covering space discovery, booking management, and account workflows.
- Integrated Firestore listeners for booking updates and reviews, with reusable search, filter, and interactive map components.

NexaCare — Clinic Management Desktop Application
Python · Flet · MariaDB · MySQL Connector

- Developed a desktop clinic management system with patient records, appointment scheduling, and separate dashboards for doctors, HR staff, and administrators.

BigBrew POS — Cafe Point of Sale Desktop Application
Python · Flet · Desktop Application Development

- Built a desktop point of sale system for a cafe using Python and Flet, providing an application interface for cafe sales operations.

Work Experience

Call Center Agent **iXL Solutions Philippines** **May 2023 – July 2023**
Inbound and 24HF Skills Iloilo City, Philippines

- Handled high-volume inbound customer interactions, troubleshooting issues and providing solutions based on established processes.
- Navigated multiple software systems to access information, document interactions, and resolve customer requests accurately.
- Collaborated with team members to escalate complex issues while consistently meeting quality and performance standards.

Education and Certifications

Bachelor of Science in Information Systems *Expected Graduation: July 2027*
West Visayas State University – Main Campus | Iloilo City, Philippines
Relevant Coursework:
Thesis: An Integrated Mobile Vision and GIS Early Warning System for Precision Mitigation of Spodoptera frugiperda in Glutinous Corn

Interests

- Building responsive web interfaces and practical full-stack applications
- Integrating real-time data, interactive maps, and AI services into web applications
- Exploring web architecture, API integration, and application performance
